Making innovation work
is our drive as well as our deliverable

10,000 m² infrastructure

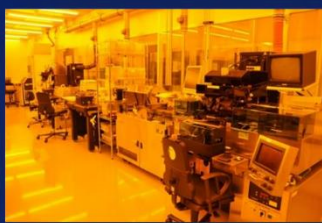

test & prototyping facilities | cleanrooms | labs

ISO certified

9001 | 13485 | 14001

MEMS & thin film products

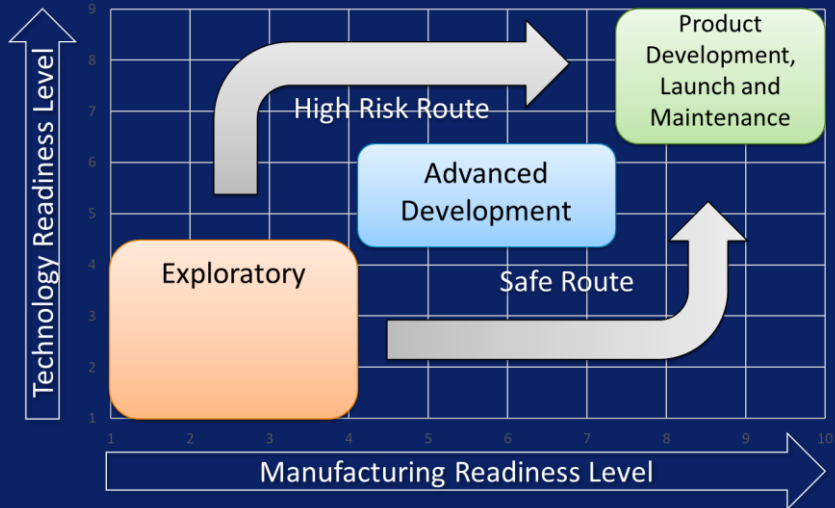

Micro (Device) assembly & complex PCBA

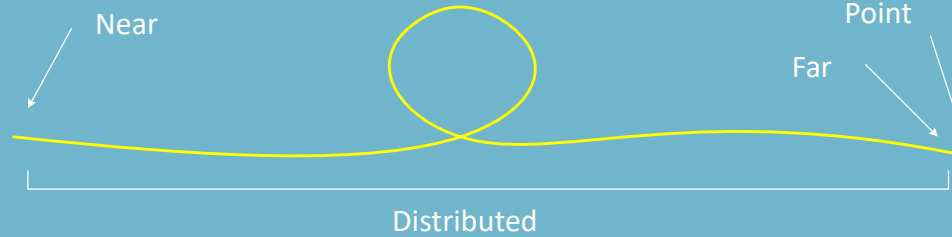

High Tech Campus, Eindhoven

"Greenhouse" Strijp-S, Eindhoven

Fiber sensing

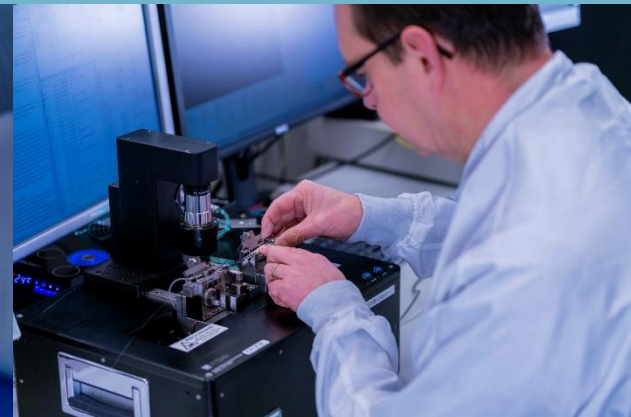

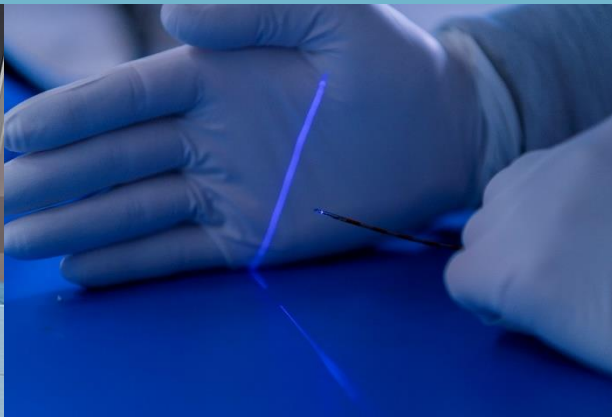

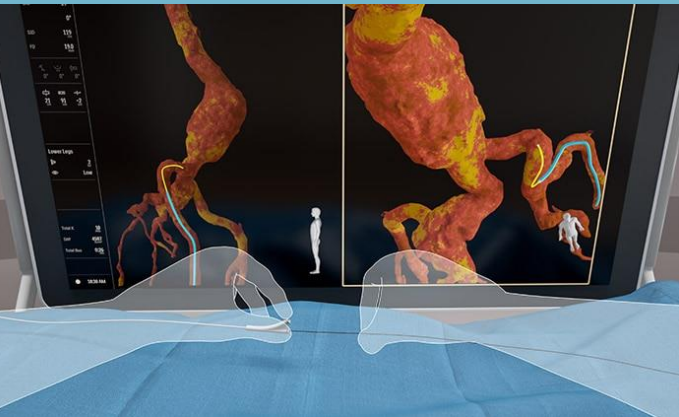

What do we do?

- Fiber processing & probe prototyping
- Optoelectronic micro-assembly
- Design for manufacturing & process development
- Volume production

Examples

- Catheters
- Spectroscopy:
 - Dental
 - Surgical
- Imaging
- Power over fiber
- Other

The Question

What can we do for you?

- Develop the product, build prototypes
- Scale up the product to volume manufacturing
- Comply with ISO 13485

What can you do for us?

- Come to us with new challenges, technologies
- Teach us about applications and market
- Help us grow the competencies
