What we do

PRODUCT

Manufacturer of **metrology tools** for the ophthalmic market.

WW leader in Quality Control for contact lens & IOL (install base > 400)

ENGINEERING

Supplier of engineering services to design **custom optical systems**

Optics, opto-mechanics, electronics, software, algorithms engineering

CONTRACT MANUFACTURING

Optical based products

1000m² of CR facility

High precision tooling for optics assembly & metrology

Design services, certification

MARKET FOCUS

- Ophthalmics
- Industry
- Medical
- Space
- Security

SME created in 1996 (spin-off from ULB)

Team of 45

What can we do for the hyperspectral community ?

Deliver an innovative hyperspectral imaging device

HYPE

TECHNOLOGY

- ✓ Multiplexed Fourier Transform spectrometer (1 spectrometer per pixel)
- ✓ High spectral resolution (8cm-1 or 0.13nm @ 400nm)
- ✓ High spatial resolution (diffraction limit, 150nm/pixel for 40x objective)
- ✓ 400-900nm extendable to SWIR 1700nm
- ✓ Compact & robust for use **at-line** (industry)

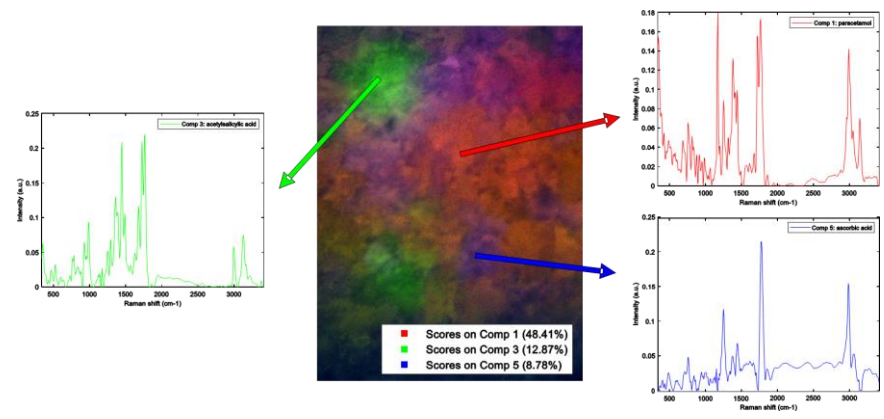

USER

- ✓ High-throughput hyperspectral imaging device (3Mpx data cubes in ~100 sec)
- ✓ Ultra-high speed for global Raman imaging (>1000x faster than confocal Raman microscope)
- ✓ Tunable FOV (mm² ~cm² range)
- ✓ No sample damage

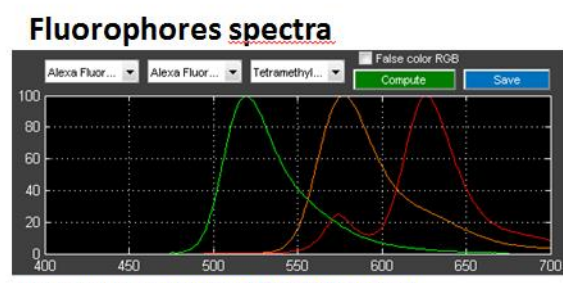

Applications: microscopy oriented

Global Raman imaging

Pharma: API spatial distribution on drugs (2020, Univ Liège, E. Dumont)

Fluorescence spectral imaging

Biotech: cell imaging (2014, UCL, P. Courtoy)

Biotech: SERS imaging of cells and tissues (2020, Univ Liège, E. Dumont)

Contamination control: chemical residues imaging (2019)

Vital fluorescence linear unmixing (2014, UCL, P. Courtoy)

What can you do for us

- ✓ Every collaboration focusing on use cases at end-user
- ✓ Working together on end-users samples
- ✓ HW: low noise 2D detectors, try SWIR detector
- ✓ HW: Narrow band SS laser sources (100mW to a few W)
- ✓ Hypercube data analysis software
- ✓ Commercial distribution

Thank you for your attention !
