

See the invisible

Presentation for: EPIC Online Technology Meeting on Photonics for Improved Pharma Processes

Andreas Vidman, CEO and Co-founder

What we do

Hyperspectral imaging

Opens up a new dimension in analysis of materials

Chemical analysis in an image using visible / near infrared cameras

Spectral fingerprint in every pixel becomes information using machine learning

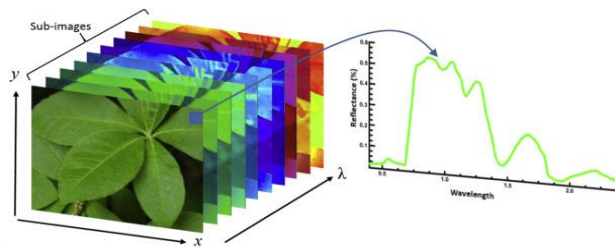

Fast, non-destructive and better info on heterogenous materials

Prediktera - Software for hyperspectral image analysis

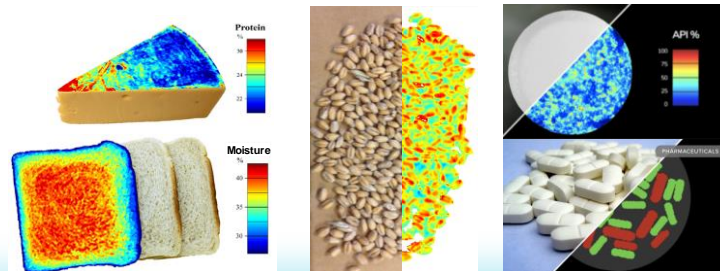

From idea to solution

Easier and faster to implement → reducing time to market

13 years experience in software and application development

Food, Agro, Pharma etc...

What we offer

Software suite from R&D to real-time industry systems

*Exploratory analysis
R&D*

*Application development
Lab scale analysis*

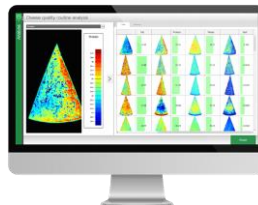

*Real time / embedded
In-line in process*

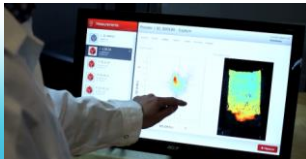

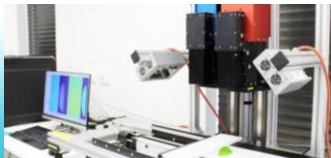

evince.

breeze.

breeze runtime.

What we are looking for

Contact me to discuss your applications and feasibility studies

We are looking for customers and partners

End-users and integrators / machine builders
