

**Say „Goodbye“
to test strips!**

**Non-invasive blood
sugar monitor**

A presentation by:

Thorsten Lubinski (Co-Founder)

450m

**People worldwide
suffer from diabetes**

Same procedure for the last 30 years:
Finger pricking & test strips!

Solution:

Non-invasive glucose monitoring

**Painless detection through the skin...
Relax your finger on our sensor and
get your blood sugar value in 10 sec.
No more blood needed!**

Roadmap

The future is not so far away...

2019

**Base Platform,
proof of technology,
CE approved 1Q2019**

2022

**Pocket Size, device
for end consumer**

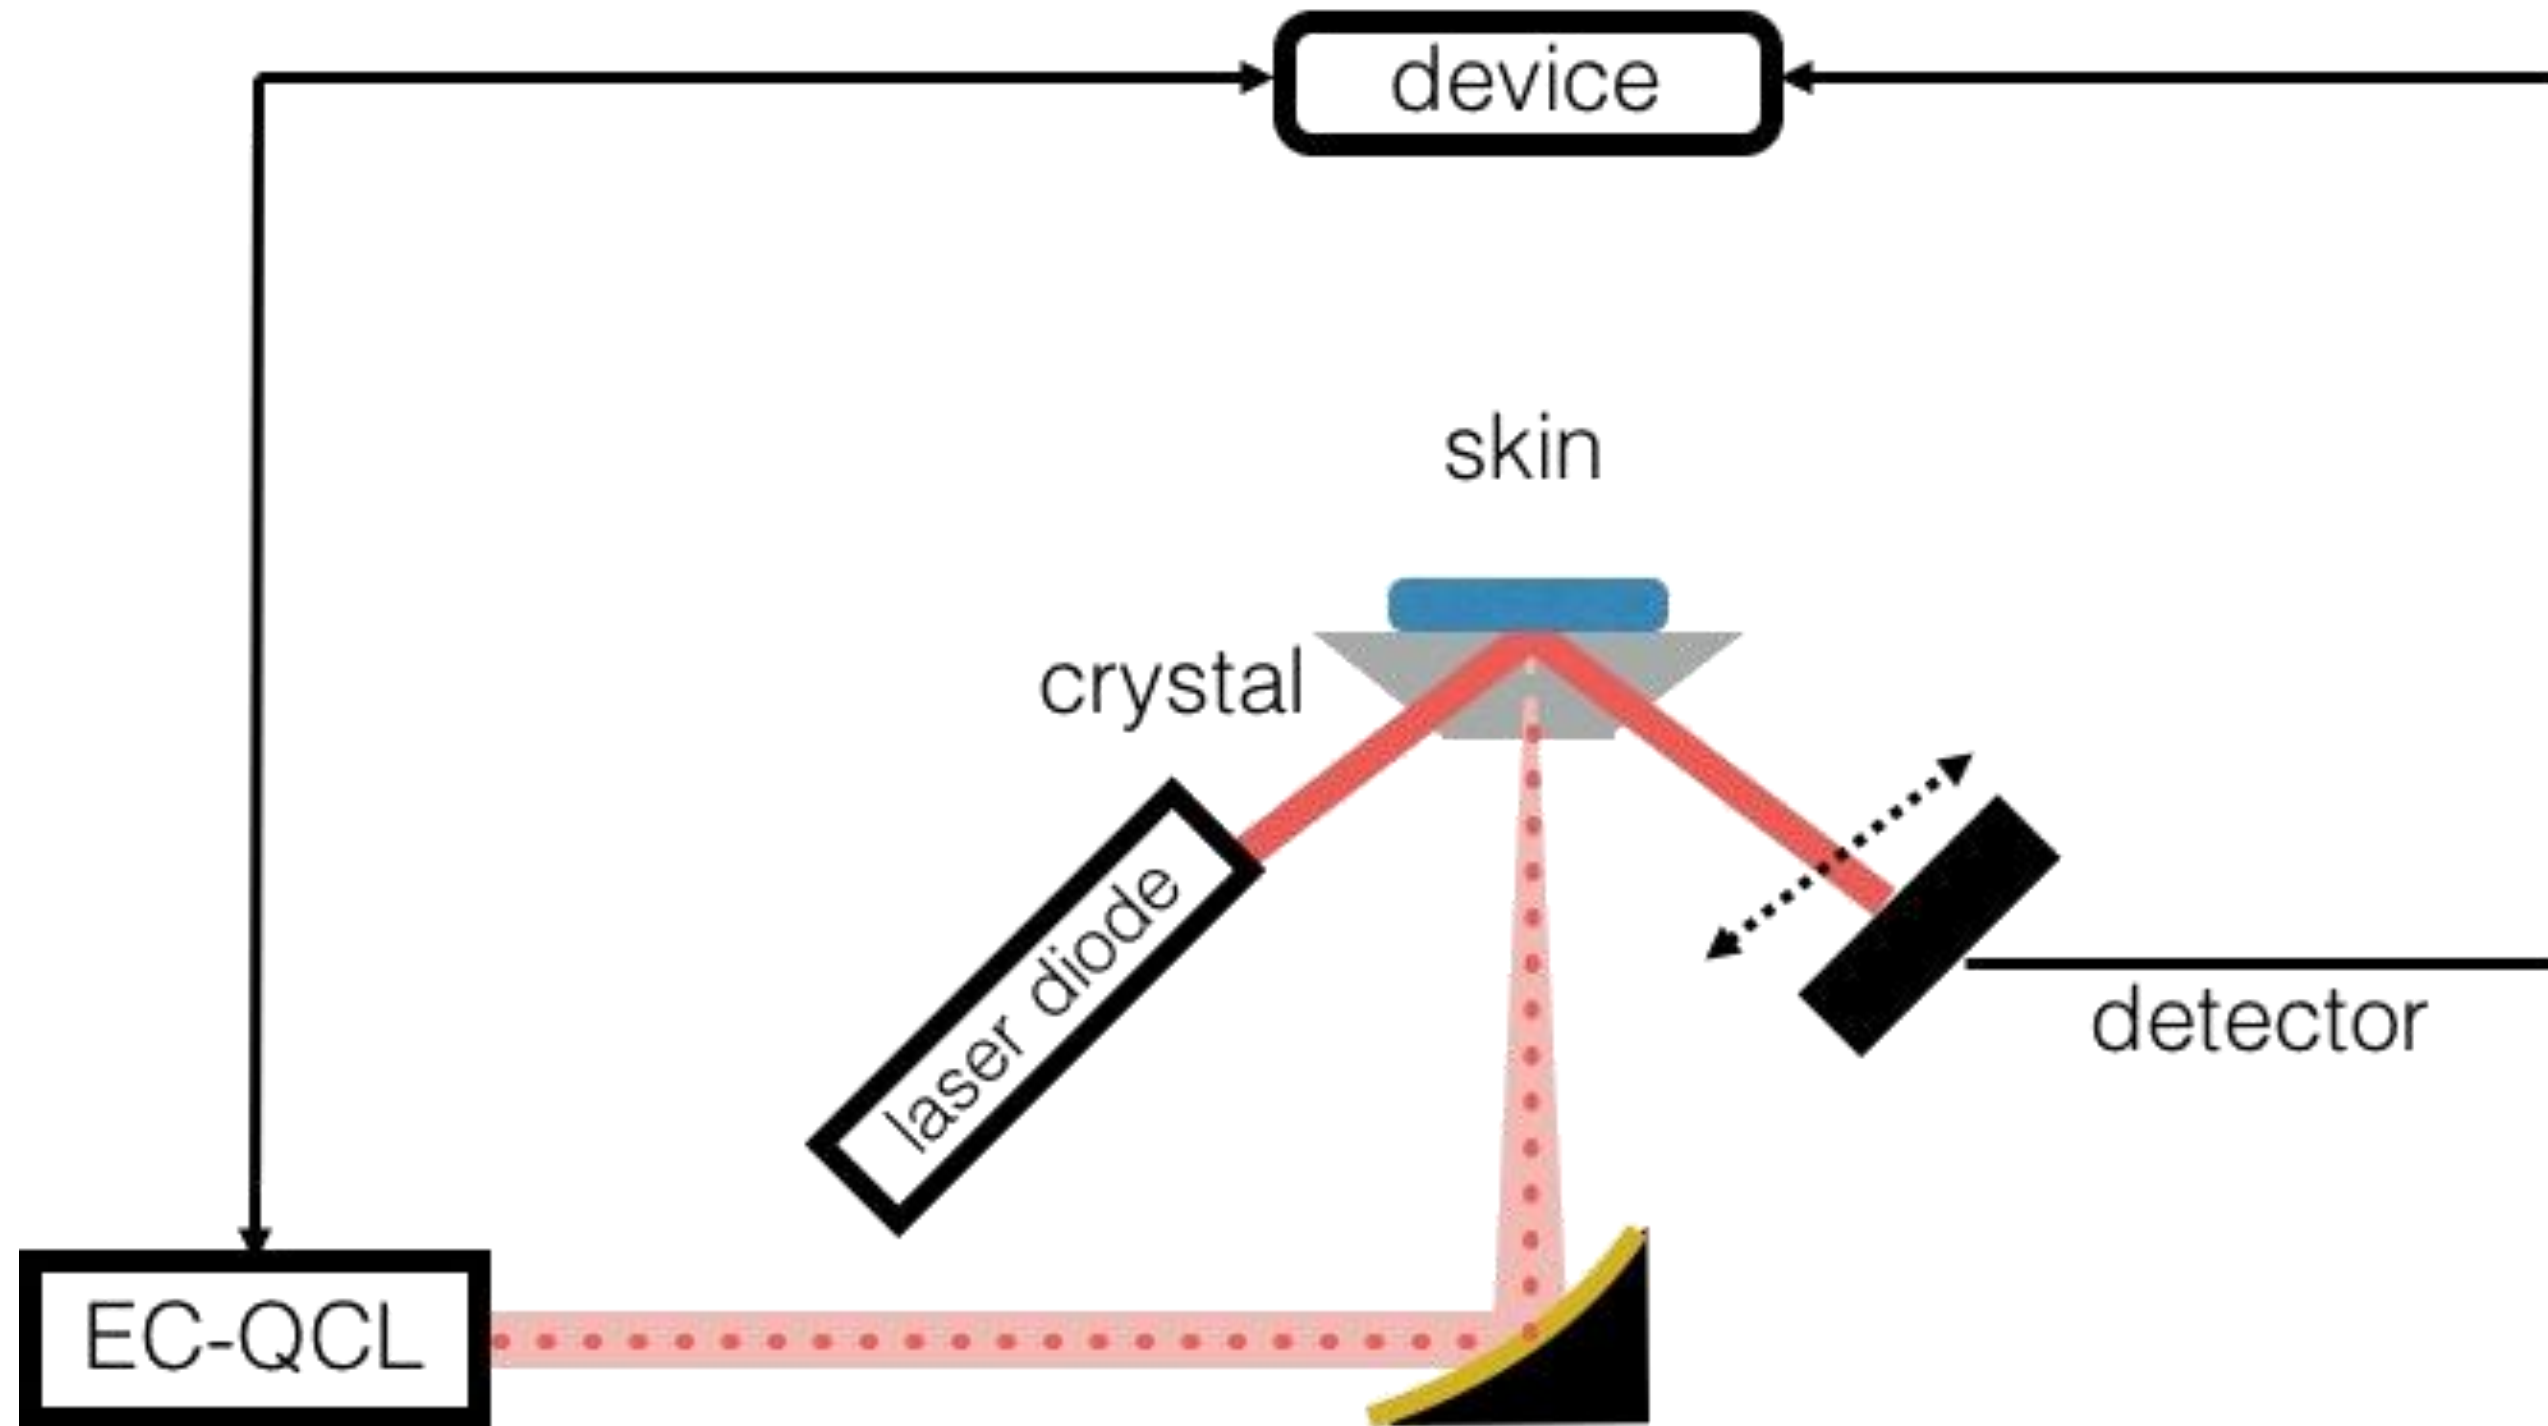

2024

**Wristband,
continuous monitor**

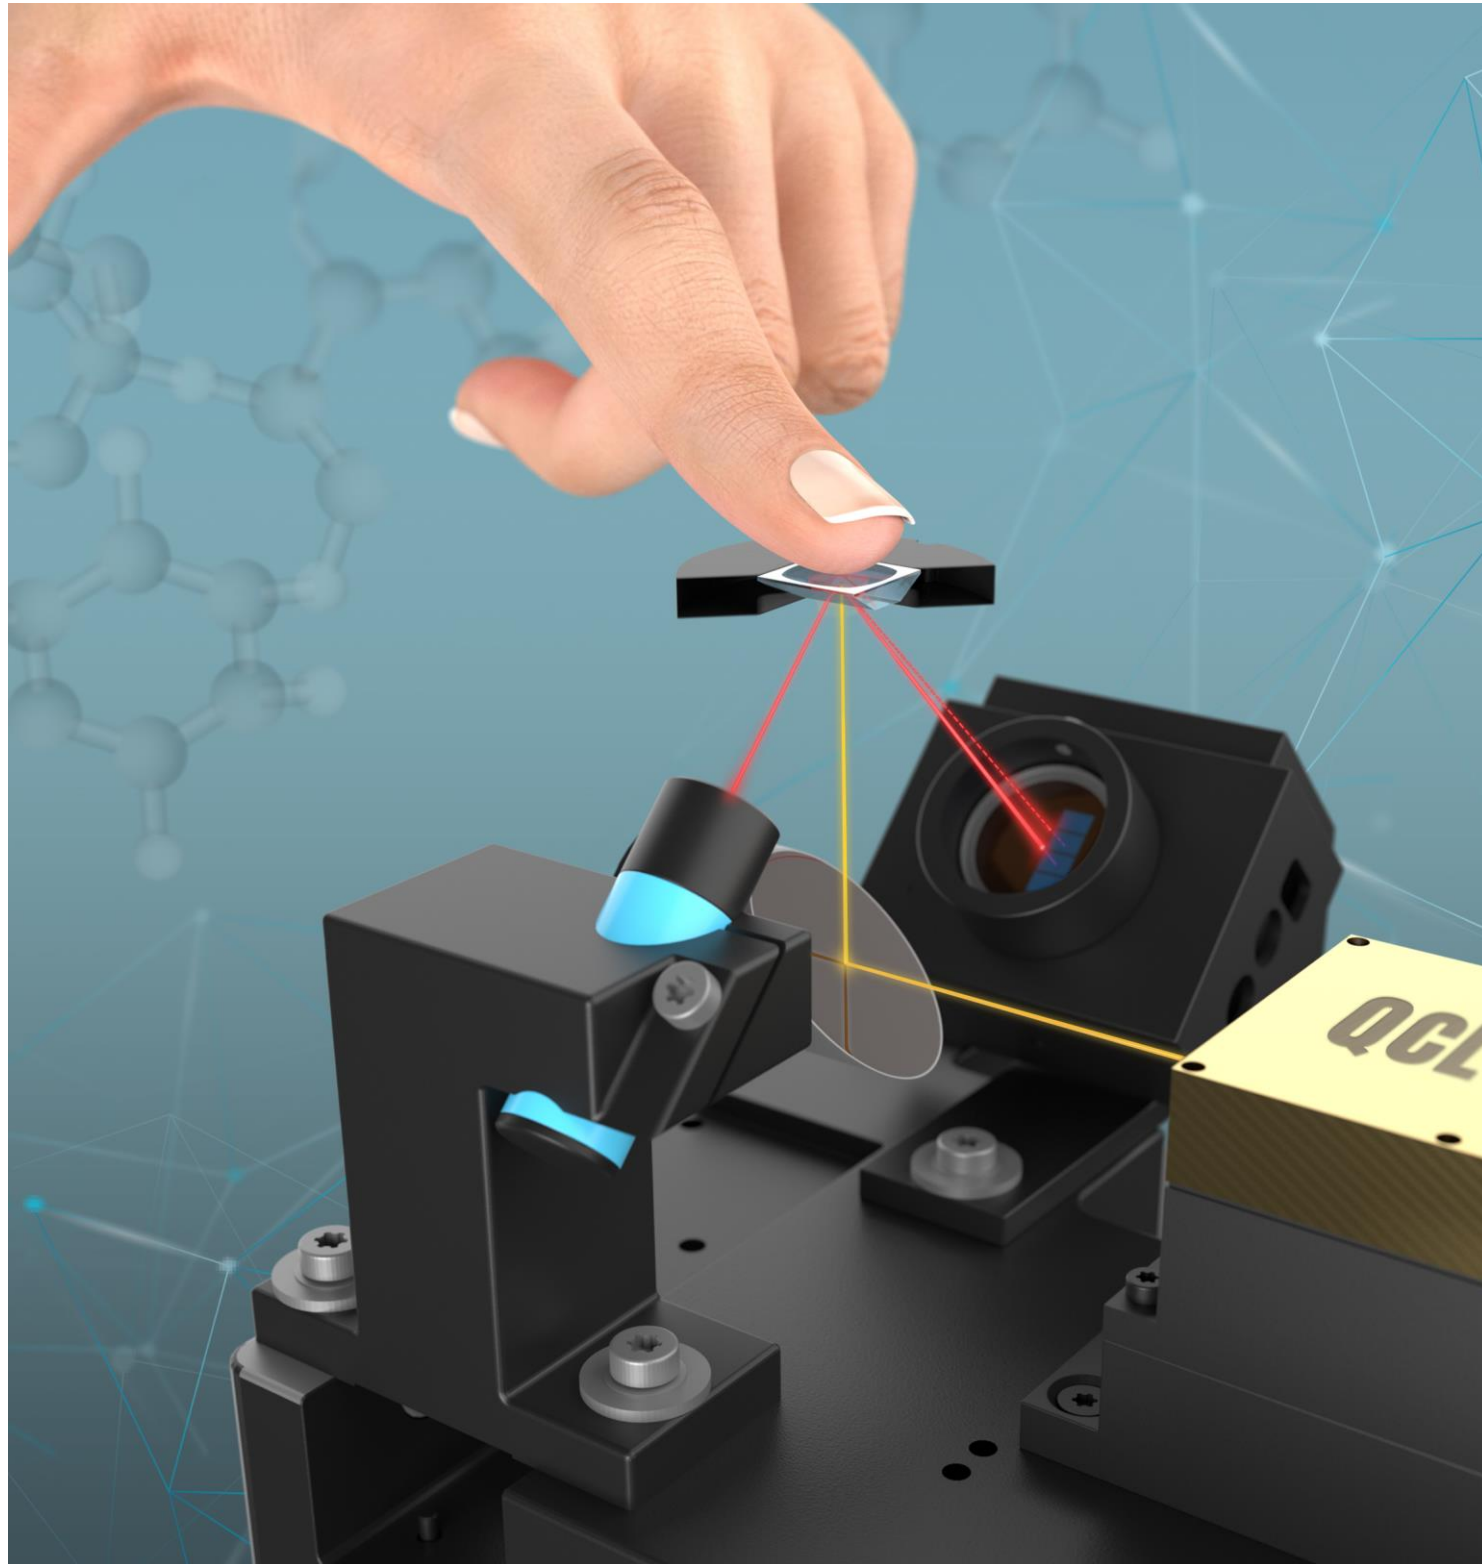

How do we measure?

Measurement technology platform based on IRE-PTD-spectroscopy

How do we measure?

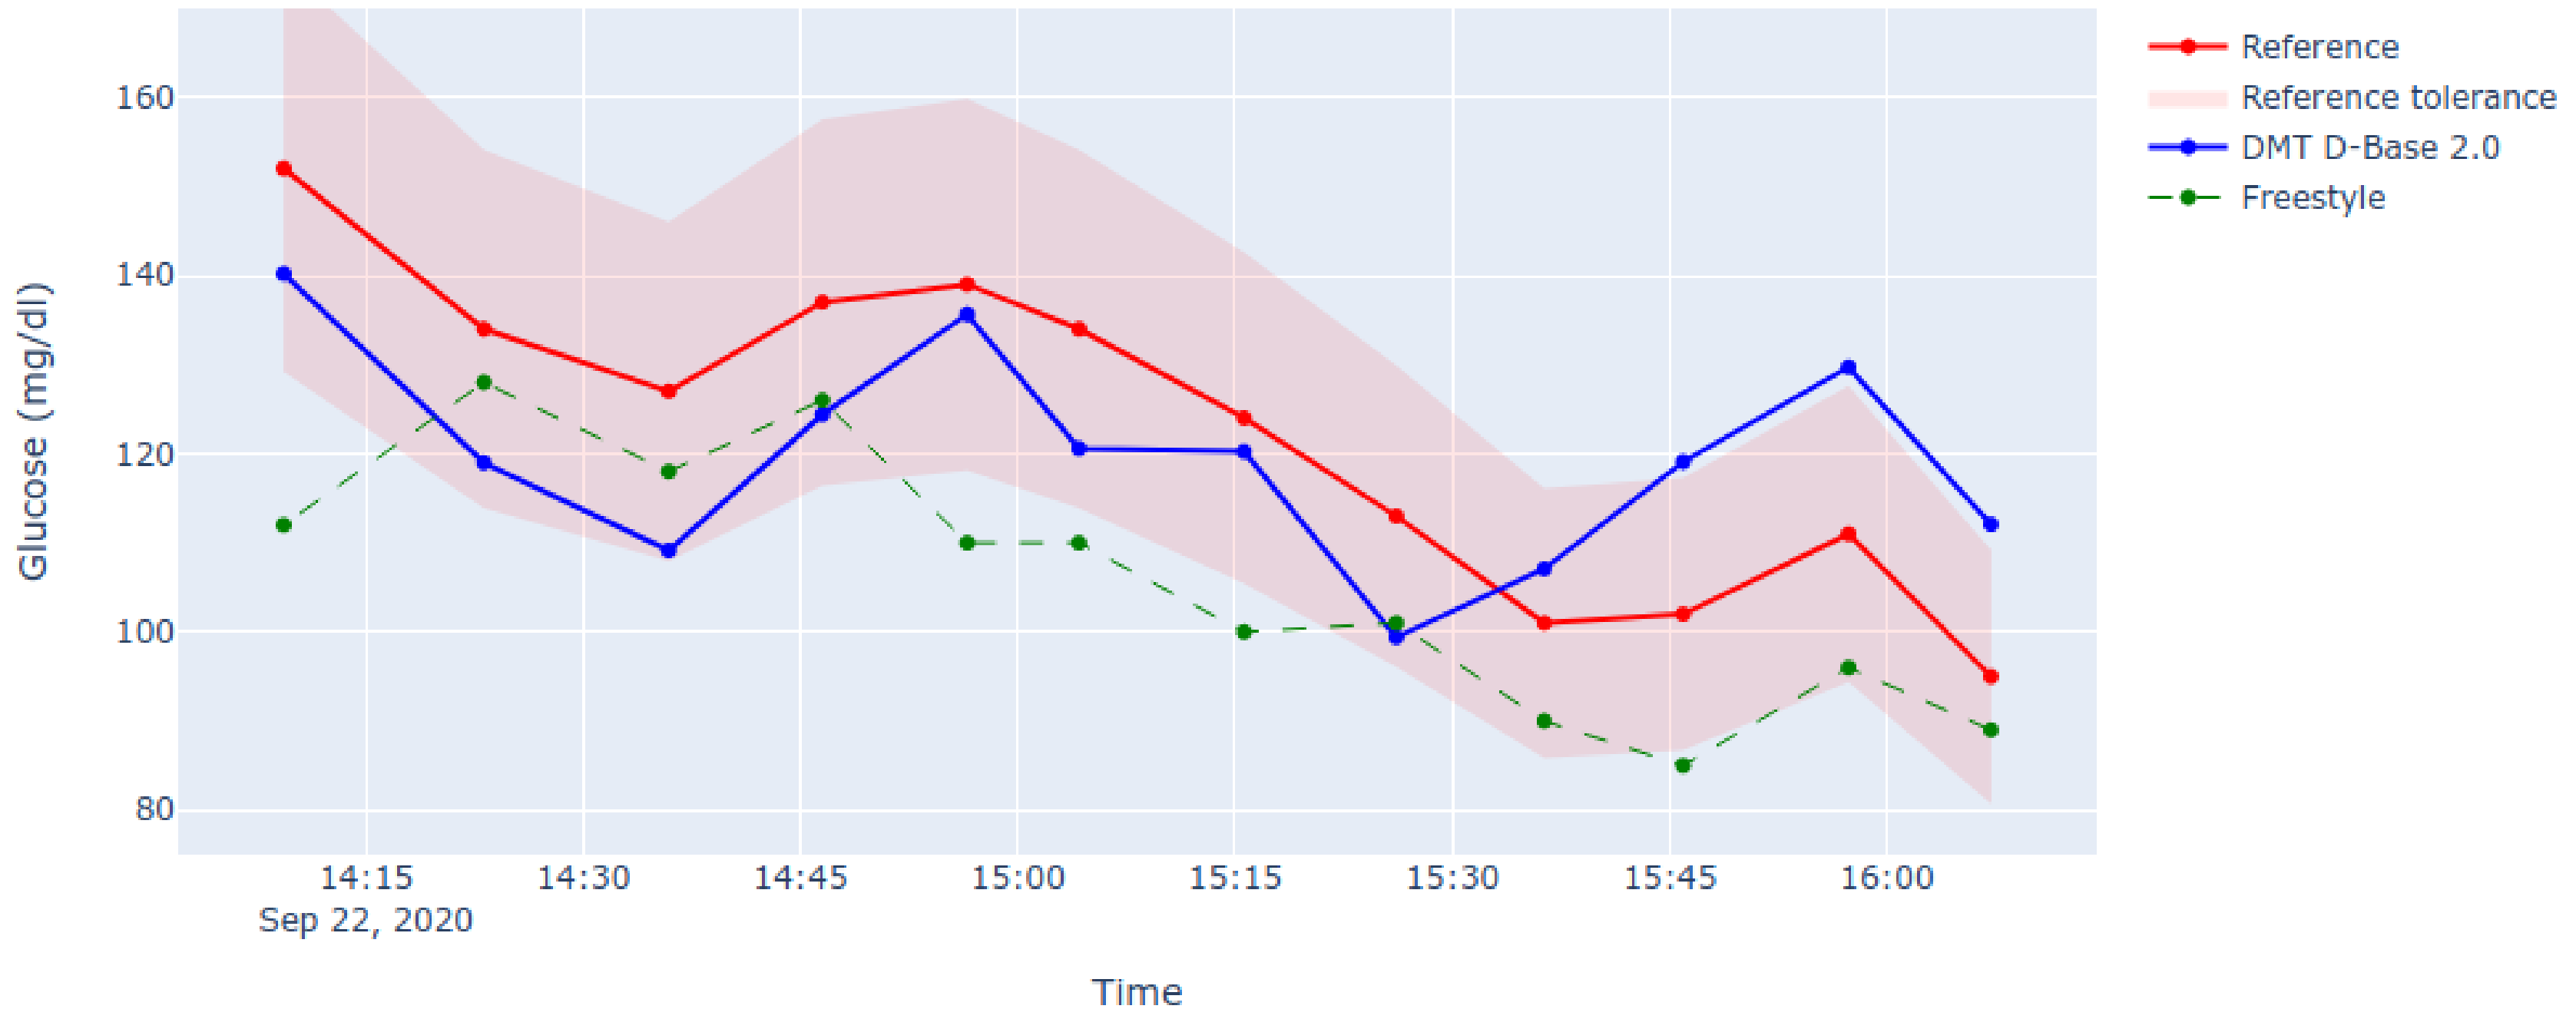

Measurement technology platform based on IRE-PTD-spectroscopy

Accuracy on the same level as (minimal-) invasive devices...

Tech Live Demo

MARD: 10.6%

“

I'm looking forward to the day when our kids don't have to finger prick anymore. I hate the stabbing, clicking sound the device makes!

We are here to help
