New Opportunities for the Quantum Photonics Supply Chain

Organisation

Provider of Advanced Photonics and Quantum Components

Core Services

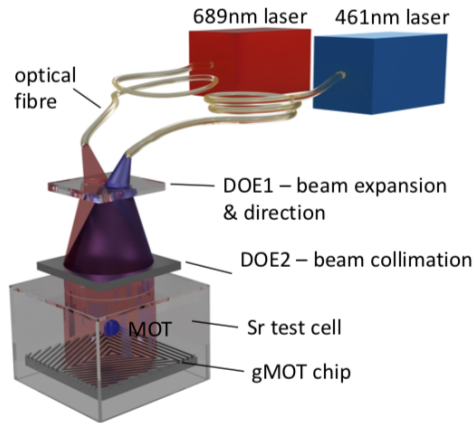

Electron Beam Lithography
Engineering the Future

Prototyping
Making Ideas Reality

Components
World Changing Innovation

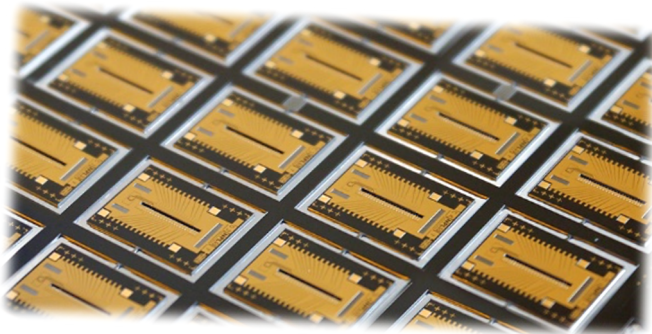

Components for Quantum Systems

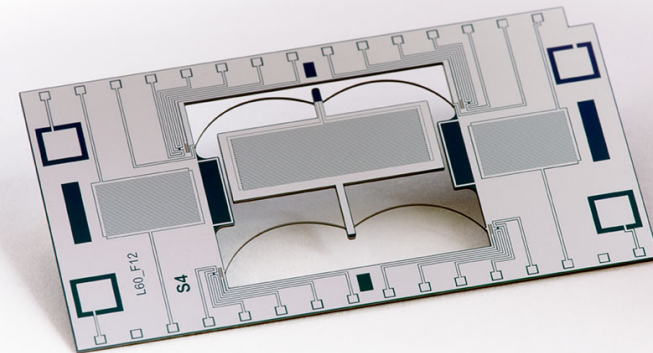

Miniature Magneto Optical Trap

Magneto
Optical
Trap
Gratings

Microfabricated Ion Traps

Wee-g: portable gravimeter

Quantum Technologies: Supply Chain Opportunities

Opportunities in translating laboratory experiments to portable demonstrators and deployable technology.

Quantum systems for precision references for frequency, timing, sensing and information processing.

Applications in data networks, financial services, transport, agriculture, mineral prospecting, navigation and computing.
