

**VERTICAL LASER SOLUTIONS : SEI LASER IS FOCUSED ON DESIGN, DEVELOPMENT AND PRODUCTION OF THE MOST ADVANCED LASER SOLUTIONS FOR THE WORLD OF DENIM AND FASHION TEXTILES**

**OUR TODAY REQUEST: Our well-developed Laser system need good eyes to detect and recognize fabrics, textiles and/or printed images in order to guide SEI laser unit and turn the system into a real digital cutting room.**

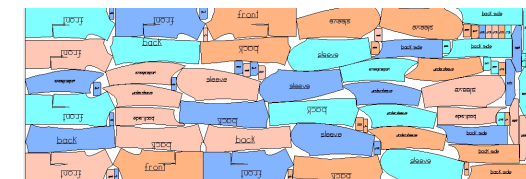

- **PROCESSES:** marking, engraving and cutting of fabrics FINISHED or from roll to stitching.
- **PROCESSABLE MATERIALS:** natural and synthetic fabrics, TPU, technical textiles
- **TARGET PRODUCTS:** Fabrics, Garments, Denim and jeans, Footwear, Sportswear, Bags

**SEI Laser system in immediate need of a solution:**

- **X Type :** For laser cutting single ply digital cutting room on fabric with checks and stripes, special patterns or printed (traditional or digital printing)

Thanks to Icaro Textile Software you can obtain, in just a few, simple guided steps vector images, raster graphics or decorations and optimize the position of the material to be processed (reduction of waste material!)

**X type by SEI Laser is a digital and eco sustainable laser solutions for textile processing with maximum efficiency and quality.**

It replaces the traditional and manual methods for engraving and cutting of raw, plain or printed fabric materials.

**VERTICAL LASER SOLUTIONS : SEI LASER IS FOCUSED ON DESIGN, DEVELOPMENT AND PRODUCTION OF THE MOST ADVANCED LASER SOLUTIONS FOR THE WORLD OF DENIM AND FASHION TEXTILES**

## OUR PRESENTATION TODAY

**How a well-developed Laser system can make a denim Jeans or a wearable fabric more sustainable without compromising quality and design**

- **PROCESSES:** marking, engraving and cutting of fabrics FINISHED or from roll to finishing.
- **PROCESSABLE MATERIALS:** natural and synthetic fabrics, TPU, technical textiles
- **TARGET PRODUCTS:** Fabrics, Garments, Denim and jeans, Footwear, Sportswear, Bags

SEI Laser Solutions for the Textile and Fashion market:

- **Matrix :** For roll to garment production fully laser finished and cut
- **Flexi Denim:** For on finished garment decoration
- **X Type :** For laser cutting single ply digital cutting room

**TEXTILE Line by SEI Laser** is the new range of **digital and eco sustainable laser solutions** for textile processing and finishing with maximum efficiency and quality.

It replaces the traditional and manual methods for discoloration, abrasion, decoration, marking, engraving and cutting of jeans, finished garments and fabric materials.
