

Software for Laser Machines

EPIC AGM 2022, Vilnius

directmachining.com

Our story

DMC

Founded in 2014.
Based on laser micromachining background.

13 employees.
9 software developers.

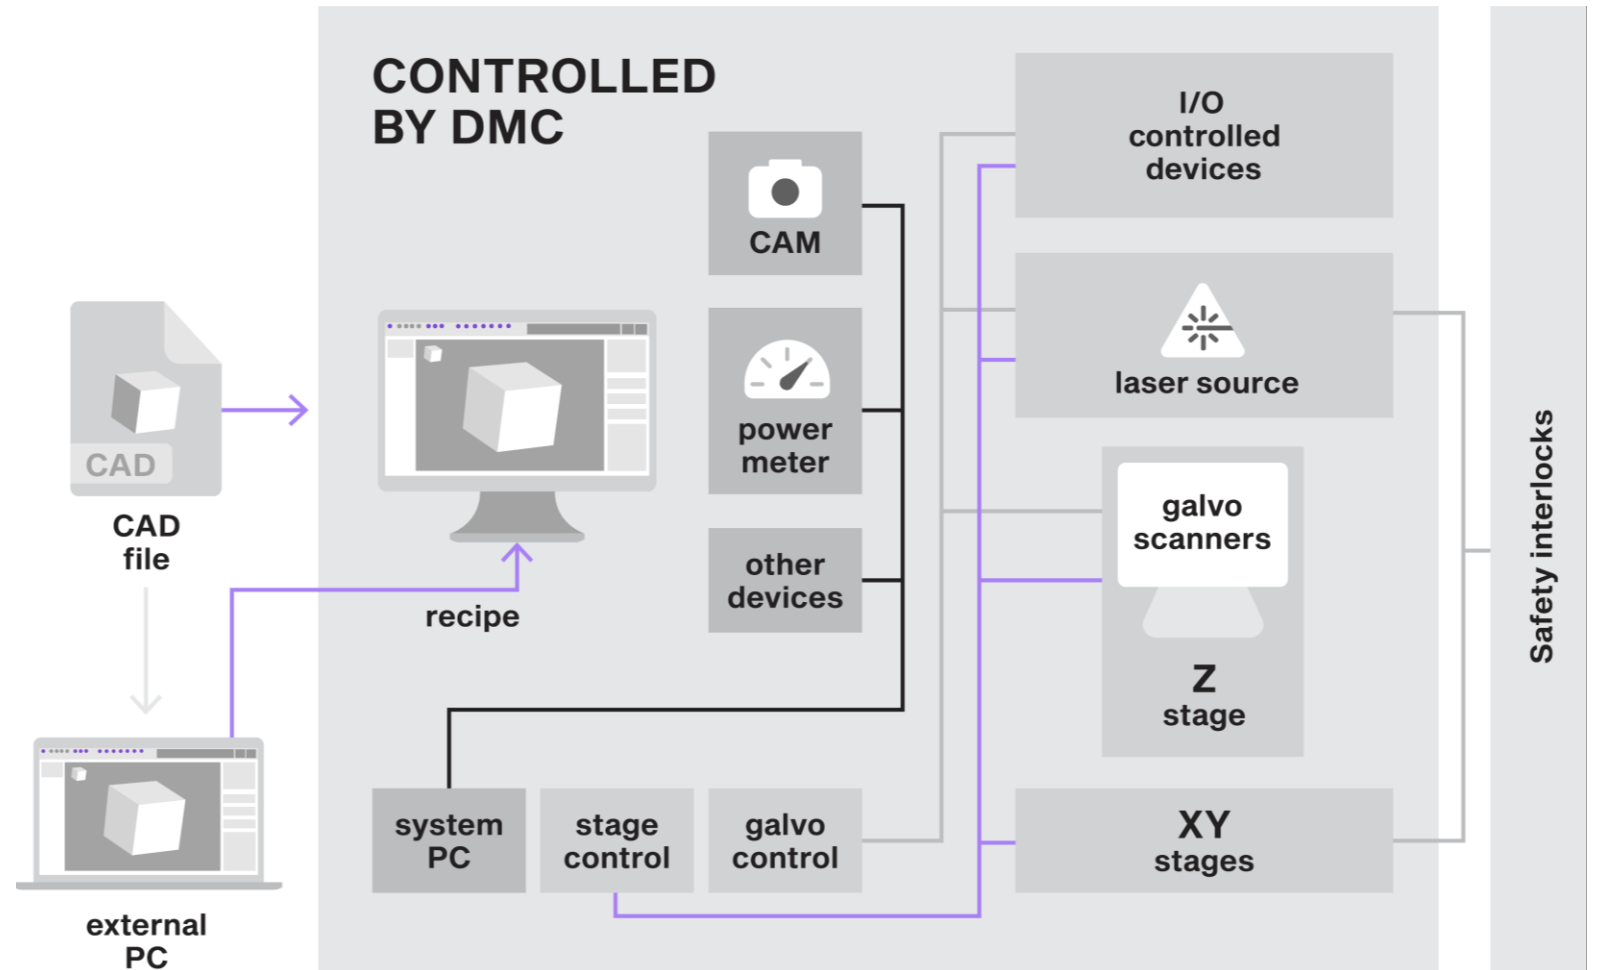

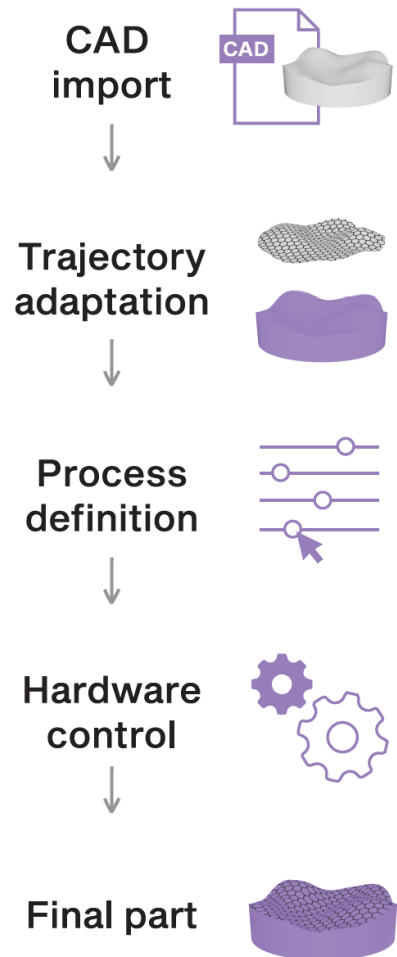

25% acquired by TechInvest Holding in 2021.
Staying hardware independent.

450+ laser machines running on DMC software.
100+ per year.

What is DMC?

DMC

Applications range from AM to 5-axis texturing

DMC

SLS, SLM, 2PP, 3D printing of metals, ceramics and plastics

Various electronics applications, combining stage + scanner

3D surface processing, including with robots and 5/8 axis systems

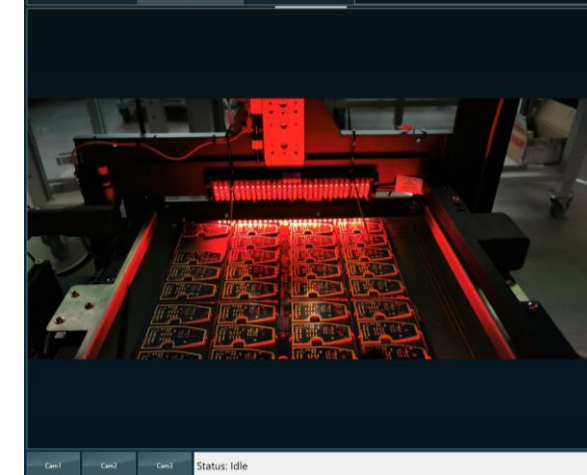

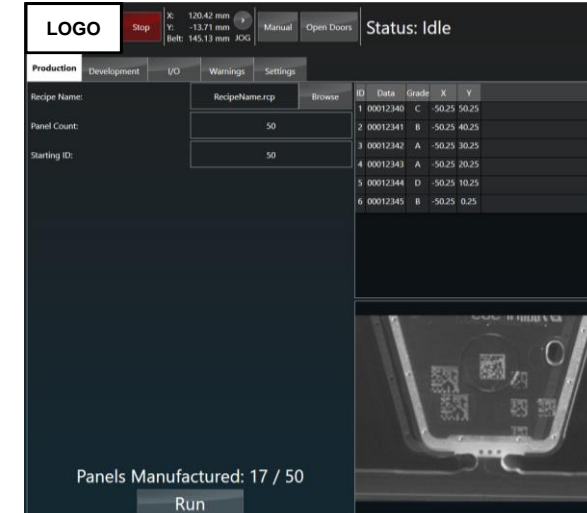

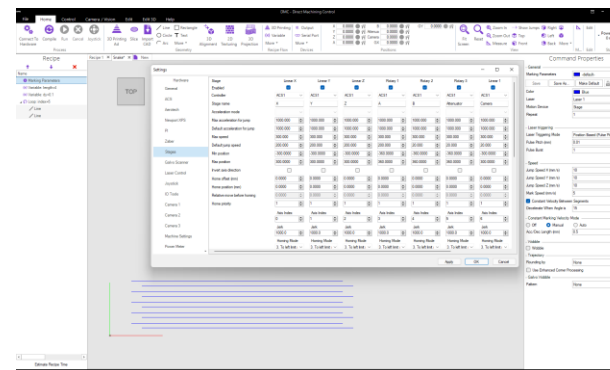

Unique proposition

DMC

Laser application comes first!

- Application development
- Workflow automation and integration
- Custom operator's HMI

- Flexibility in hardware configuration
- Flexibility in process implementation
- Control of the whole system, calibration tools
- Customization for the process and the machine

Forget this complicated
part of your project.

We already took care of it!
