

Forest&Photonics is a unique professional event that brings together the forest and technology experts to network, collaborate and share their experiences, challenges and solutions.

# FOREST&PHOTONICS

## 9 – 10 NOVEMBER 2022

Photonics applications to forest industry needs

From forest inventory to daily products

Unique place - Koli National Park

Workshop

Forests cover more than 75 per cent of the land area of Finland

Forest industry in Finland consists of mechanical (timber) and chemical (paper and pulp) forest industry.

Finland is one of the **world's** largest producer of pulp, paper and cardboard and one of **Europe's** largest producers of sawn timber.
