

**imec**

imec spectral imaging - EPIC online meeting

Wouter Charle

# imec on-chip spectral imaging as an enabler

- Unique wafer level filter processing democratizes and commoditizes HSI
- We translate application needs into spectral imaging solutions
- From evaluation systems to customized filter manufacturing
- [www.imechyperspectral.com](http://www.imechyperspectral.com) – [hsi.sales@imec.be](mailto:hsi.sales@imec.be)

# Real-time video imaging in SWIR spectral range

## Multi-spectral

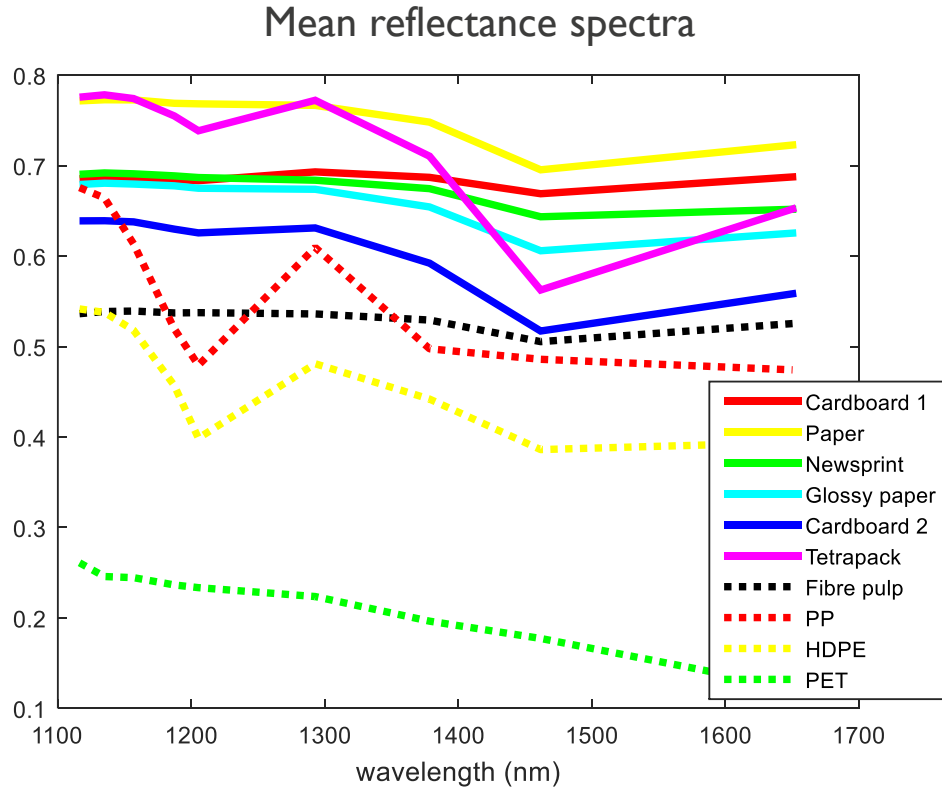

**Snapshot mosaic**  
9 / 16+ bands

## Applications:

- Industrial machine vision (quality inspection, sorting)
- Security (surveillance, forensics...)
- Agriculture (smart farming)
- Environment monitoring (oil spill detection, deforestation...)
- Medical (surgery, pathology microscopy, wound monitoring...)

# Spectral signature of plastics & cardboards

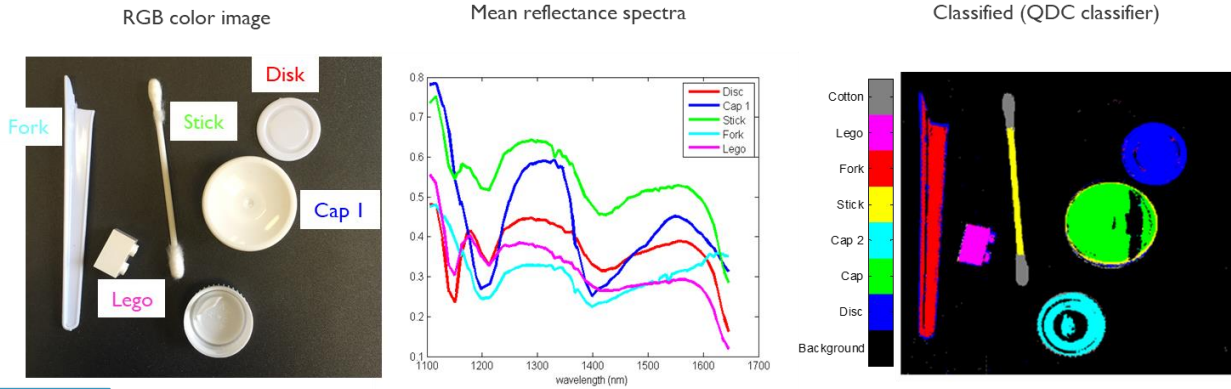

Machine Learning Classifier

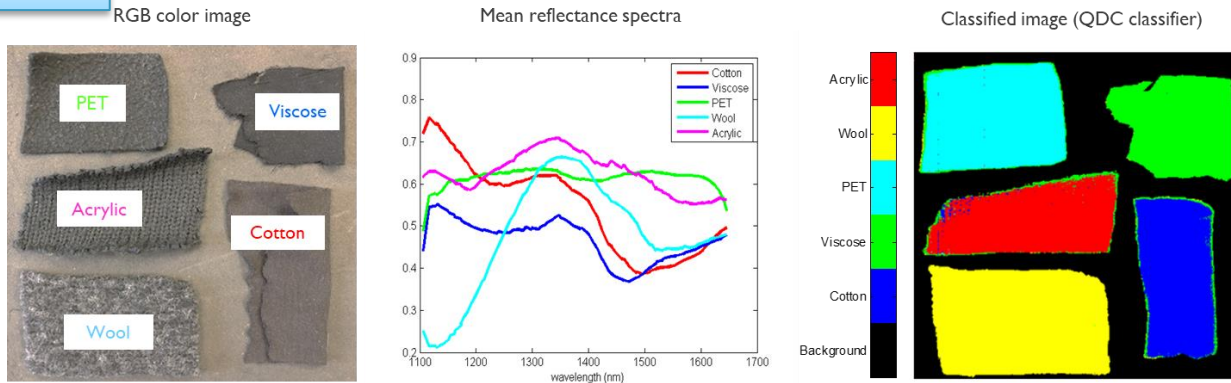

# Unique spectral signatures of materials.

...enables potential use of hyperspectral imaging

## Plastics

## Common Textile Materials

# Discrimination of plastic & other materials

-  Background
-  Cardboard 1
-  Paper
-  Newsprint
-  Glossy paper
-  Cardboard 2
-  Tetrapack
-  Fibre pulp
-  PP
-  HDPE
-  PET
-  News print
-  Glossy print
-  Tetra print
-  Specular

# Demo room imec

Imec's hyperspectral imaging demo room

# Application examples

## Plastic tray inspection

- Some traces of water are not visible using an RGB camera.
- Imec's SWIR hyperspectral snapshot camera can discriminate between the different materials in the scene

RGB color image

Classified (SAM classifier)

- Plastic tray
- tape
- thin water
- thick water

# Conclusions

- Various recycling applications compatible with Snapshot SWIR 9 (1100-1650 nm)
- Textile, plastic, paper and other material discriminated with high accuracy (>90%)
- Advantages imec snapshot imaging:
  - lower cost
  - compact
  - high speed (up to 120 cubes/s)
  - easy to integrate
- Compatible with unconstrained environments
  - Bin picking, robotization, unmanned vehicles, etc.

# imec on-chip spectral imaging as an enabler

- Unique wafer level filter processing democratizes and commoditizes HSI
- We translate application needs into spectral imaging solutions
- From evaluation systems to customized filter manufacturing
