

Photronics Finland

Photronics Finland is a technology oriented association that drives the photonics industry in Finland. It gathers Finnish photonics companies, academia, industries that apply and adapt photonics and public authorities under the national network.

Photronics Finland develops practices to coordinate and develop Finnish photonics internationally by working closely with other European photonic clusters which are sustained by European Union Photonics Platform (Photonics21).

OPD2023 offers an unique opportunity to learn from interesting presentations, network with companies, students and researchers in the field of photonics and optics, but also to explore products and services in OPD Exhibition that is held during the conference.

Also there is a lot of other activity such as Networking Dinner, Job Fair, Student meeting, Nordic Photonics meeting, PREIN flagship networking event, Photonics Finland annual meeting, Women in Optics and Photonics event and also Poster- and Pitch sessions.

OPD 2023 Industry themes

- Spectral & Hyperspectral Imaging
- Nano & Microphotonics
- Photonics in Security and Defence
