

# Phaseform Delta7: Transmissive wavefront modulator

- Refractive: Compact, Stackable
- Continuous surface, Diffraction-free, Polarization-preserving
- VIS-NIR wavelength range
- 7th order Zernikes, 63 electrostatic actuators
- Linear & hysteresis-free  
→ Open Loop / Sensorless
- 20 - 50 Hz switching speed
- > 80% uncoated transmissivity

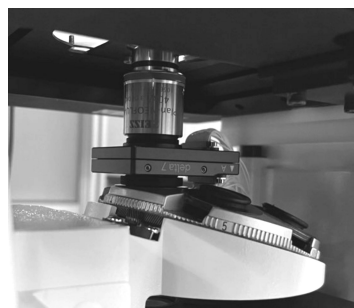

Without AO

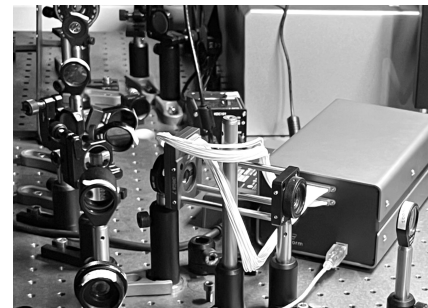

With AO

5 μm

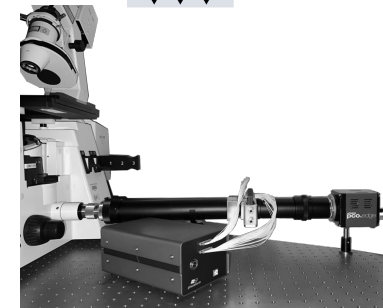

Two-Photon microscope / Single neuron / Mouse brain

Turret mount

Self-built microscopes

Camera port add-on
